"Challenge of the Universe". Hynek, Allen J. McGraw-Hill Book Co., Inc. 1962.

As vast as the distances within the solar system are,	65
Choose any object –	42
From the scientific point of view,	26
Galaxies are the building blocks of the universe.	102
How far can you see?	7
In setting out on a journey,	49
Just what is a star?	88
Long before the distance to any star was known,	82
Now that you have read Dr. Hynek's thrilling account of	117
Once upon a time . . . no,	57
Radiation is truly the "raw material" of the astronomer	71
Sometimes astronomers become census takers.	96
The bright star Vega in the lovely constellation of Lyra	108
The sun is a mighty star,	34
"Twinkle, twinkle, little star"	77
What do you think of the universe now?	114
What is the ideal space vehicle?	21
Where do you live?	12
